"CLIPS, QUOTES, and COMMENTS" is issued on the first and fifteenth of each month, by the Borderland Sciences Research Associates -- -- 3524 Adams Avenue, San Diego 16, California, U.S.A. -- Twelve issues (6 months) for $5.00; six issues (3 months) for $2.50; two issues for $1.00. Contains only short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.

-- N. Meade Layne, Director.

CAN THIS CIVILIZATION BE SAVED?

by LAO RUSSELL in Bul. of the Walter Russell Foundation..

..... Until man begins to learn that lesson (of the unity of mankind) he will prey upon other men without knowing that he is preying upon himself, and that every action which hurts another also helps destroy the human race. Lack of that knowledge is the reason for the destruction of civilization after civilization by man himself. Lack of that knowledge in this still barbarian age is the sole reason for another fall of man which is now rapidly taking place. . . Our race does not realize that another Dark Ages is fast approaching... Man knows how to do many things, but has no knowledge regarding the WHY or CAUSE of the effects his senses have observed.

That is why man is now ignorantly planning the destruction of the planet, as well as of the human race and all other organic life by using the death principle for human advancement. It will not take many years to utterly destroy the four encircling protective walls (which we call radio ceilings) which surround this planet and protect this earth..,

But the burning process has started. The planet has begun to dry up. Its temperature is rising as man's temperature rises when he has a fever. Ice caps and glaciers are melting so fast since the Hiroshima bomb was exploded, followed by 43 others, that the ocean has risen nine inches, which threatens all coastal water supply with salt. World droughts are causing vast new deserts and dust bowls to form.

The consequent warming of the ocean has driven all the fishes of the seas ten degrees farther from the equator to survive, and those within a hundred miles of the last H bomb are becoming so radioactive that those who eat them are sickened. (These conditions) will at first drive man into the northern latitudes above the fifties, then gradually farther north, until not one man will be alive on this planet, if radioactive fission is continued in usage much longer, for either industry or war. *

Its damaging effect does not stop when man's use of it stops. It goes on and on for many years.

The only way to reverse the downward trend of decadence is to enlighten the few who are ready for such knowledge.** . The answer as to whether this civilization can be saved or not lies in the numbers of you who will transform other men's thinking in time to save it... You will think such a task difficult (yet) you will find that the material-minded will soon listen eagerly to anyone who will show them a way out of the suffering that will soon engulf those whose money will begin to count for nothing and whose ability to pile up more of it will disappear as Nature increases her punishment for what man has done to her. . .

- end -

* "Either industry or war". Laboratories and industrial plants contribute a steadily increasing amount of radioactive material, in addition to the bomb tests. The cumulative effects have so far been ignored or denied. 35 times the normal r-a count in New Mexico (e.g.) is described as "well within the limits of safety".

** This is and has been for a decade the main objective of the BSRA. But ethical homilies and the rebukes and sanctions of religionism are not the kind of "knowledge" required. The "unity of mankind" is far from being a new doctrine. Only the drive of fear and of urgent self-interest will affect the masses - the benevolent despotism of an Archangel, perhaps, or its equivalent. And the elimination in some way of those unable to learn and to change. What kind of "knowledge", then? Perhaps of Powers, Forces, Realities behind the veil of appearances and the Maya of the senses. It is chiefly this, I think, which is being brought to us from the Heights of Air on the miraculous wings of the Guardians.

"C.Q.C." B-11
June 1, 1954

C.R.I.F.O. NEWSLETTER -- CIVILIAN RESEARCH, INTERPLANETARY FLYING OBJECTS, Leonard H. Stringfield, Director. P.O. Box 1855 - or - 7017 Britton Ave., Cincinnati 27, Ohio. --Current issue is Volume I, No. 2; dated May 7, 1954. 6 months subscription, $1.00; 12 mo. subscr. for $2.00. -- On the basis of the CRIFO prospectus and the issue named above, the BSR Director recommends this publication to the Associates.

Any comment by us on CRIFO 1-2 might appropriately be headed STRAWS IN THE WIND. CRIFO's evaluation of many or most of the Aeroforms phenomena is summed up in the word INTERPLANETARY - but that word is not interpreted in any narrow sense. Editor Stringfield does not content himself with a few (but admirably chosen) examples of UFO's, plus a hopeful reference to Mars and Venus - plus a page or two of exclamatory bepuzzlement.

For one thing, CRIFO is fed up with "seven years of hush-hush and playing cat and mouse with the public" on the part of the Air Force. "This can only be interpreted to mean that the AF is highly concerned and that behind the scenes something more shocking than meteorites is being concealed" (Yes indeedy, including UFO's landing voluntarily at an Air Base). "What is that something? Do they have proof of "Saucer" hostility beyond that which is theoretical? Mantell's death chase....the red spray cases over Albuquerque....the explosion of four jets over Marietta, Ga..... a near collision of a commercial craft with an onrushing ellipsoidal device near Washington, D.C., Oct., 1953....."

(Not only is the Unknown always far greater than the known - but the known is often much greater than the Told - and the told often far exceeds the Understood.... On page 3 of NEWSLETTER there is a section entitled "The Hypothesis of the Invisible Thinking Light." If so-and-so is the case, writes the Editor, "only one feasible explanation remains; the object is a material but non-metal device operating under remote control...Perhaps the sphere is metamorphosical... This realm of fringe - thinking is beyond the scope of this Newsletter... but perhaps illogical approaches cannot be categorically dismissed.... We cannot turn our heads from the possibility that another extra-terrestrial intelligence has learned the secret of transforming material into another dimension....."

We don't know that Director Stringfield and his associates want to be hailed with cries of welcome by the BSR, but we do it anyhow. It's true that Newsletter closes with a crack about "wild borderline sciences", which just maybe means Borderland and us. But the whole tone of the N.L. is one of fearless and logical thinking, and of open-mindedness even toward metaphysical and 'occult' interpretations -

And anybody who believes that these phenomena of the Aeroforms can be one-tenth understood without recourse to metaphysical concepts lying beyond our text-book sciences, will NOT understand them at all either here or hereafter - at least until much learning and UNlearning has been accomplished.

TV's BIGGEST MYSTERY

Texas Station Signal Seen In England - Three Years After It Went Off The Air!

Is there an intelligence somewhere in outer space which is beaming TV signals at the earth?
Or can television signals from Texas wander around the ionosphere for more than three years and then be picked up in England?
-These are two of the questions which engineers are wrestling with in Houston, Tex., and in Britain as they delve into the mystery of KLEE-TV.

And these are the facts:

1. At 3:30 P.M., British Summer Time, September 14, 1953, Charles W. Bratley, of London, picked up the call letters KLEE-TV on his television set. Later that month, and several times since, they have been seen by engineers at Atlantic Electronics, Ltd., Lancaster, England.

2. The call letters KLEE-TV have not been transmitted since July, 1950, when the Houston station changed its letters to KPRC-TV.

3. A check of the world's television stations confirms the fact that there is not now, and never has been, another KLEE-TV.

Paul Huhndorff, chief engineer of KPRC-TV, to whom the Britishers sent their report, has no explanation. He contends it is not unusual for signals to be received hundreds or even thousands of miles from the transmitter. KPRC-TV (and the old KLEE-TV) has been picked up at Halifax, Nova Scotia, 2000 miles away.

Such freak reception occurs when signals shoot off into space, strike an atmospheric layer known as the ionosphere, and rebound to earth. However, the reception of such pictures has been as nearly instantaneous as electronics permit. A time lapse of 30 seconds would be a cause for wonder.

Members of the old KLEE-TV staff have identified the pictures of the signals as looking like the standard call-letter slide they used. Engineer Huhndorff, waiting for more information from England, reserves final opinion. Meanwhile, he offers three theories.

1. The whole business is a hoax perpetrated by some amateur TV operator. This he discounts on the grounds of his fellow engineers' integrity.

2. The signals may have rebounded from a celestial object, a light year and a half away. This would be a mathematical miracle if it happened once. Several times is just too fantastic for belief.

3. Some intelligence in outer space has received the signal and has retransmitted it in the hope of communicating with this planet.

Those are the theories. We suggest the readers take their pick, or invent their own.
--(from TV Guide, week of April 30- May 6.) -- Cr. Assoc. E.W.H. --

Our Government Investigates Cancer Cures

On August 11th last year a governmental report was released that has been called "the most important medical document of our generation." It is a shocking revelation of powerful opposition by orthodox medicine to certain non-conformist healing institutions and practices, and this in spite of the fact that the latter have demonstrated amazing results in dealing with so-called incurable diseases, especially cancer.

Under the direction of a Senate Committee, a special counsel from the Department of Justice conducted an investigation covering the operations of foundations, hospitals, clinics and government-sponsored organizations specializing in cancer prob - lems. These are all listed.

Investigation was next extended to the Hoxsey Cancer Clinic in Texas; the Lincoln Foundation of Medford, Mass.; the Prosner-Lozenbey Cancer Clinic of Pittsburgh, Pa.; and others. Abundant evidence was presented to convince any fair-minded person that these institutions are not only pursuing sound and legitimate methods of healing, but that the percentage of cures they have effected is far too high to permit vested organized medical interests to misrepresent their true nature, to persecute their leaders, or to destroy their respective practices. The attempt on the part of the American Medical Association to do this through the courts and by extra-legal means came in repeatedly for castigation in the severest language at the counsel's command.

In one instance Mr. Fitzgerald, the official investigator, declared that the action of the A.M.A. "could involve it and others in an interstate conspiracy of alarming proportions." "How long will the American people take this?" he asked, and followed with a flagrant example of the "stranglehold of the A.M.A. on legislation which in turn affects every household in America."

Every paragraph of this report will be a revelation to many, even among those who are aware in a general way of the continual controversy that goes on between vested interests and truly free enterprise in every field, and nowhere more sharply than in the medical profession.

Mr. Fitzgerald concluded his report to the Senate by saying: "We are under a compelling moral obligation.....to the untold millions of cancer sufferers throughout the world to carry on this investigation. We cannot do otherwise."

(From New Age Interpreter, Vol.15 No.1.

*****

(The INTERPRETER, edited by Theodore Heline, is published at 1544 Cerro Gordo St., Los Angeles 26, Calif. Five issues for $1.00; singles 20¢. We continue to recommend this publication to our Associates. ML)

We can supply back numbers of Clips & Quotes; 2 issues for $1.00 - sample copy free, sent anywhere on request. Regular subscr., 12 issues for $5.00.

Also, back copies of Round Robin, our bi-monthly; singles 50¢. Subscription included with BSR membership @ $5.00 per year.

Round Robin X-1, for May-June, 1954, is now being mailed (June 1).

We again call attention to our Personal Service Bulletins and the importance of sending us the stamped and addressed envelopes - precautionary measure against possible censorship. All such services mean extra work and expense, even when our Associates pay for envelopes and stamps - so any donations, small or large, are gratefully received and put to good use.

ML

MISCELLANEA - (since it's a mixed-up world anyhow):

The many friends of the medium Mark Probert and his wife will be glad to hear that his eastern trip is proving highly successful. Meetings in New York City and in New Jersey were well attended, and were followed by an invitation to a Canadian city, where they are now holding a series of scheduled meetings. On their return they expect to hold a series in Virginia, with a probability of visiting England before they return to California.

As nearly all our Associates know, Mark Probert is one of the finest trance mediums now living, and the communications received through him have been of exceptionally high intellectual quality, mainly in the field of the sciences, metaphysics and philosophy. The BSR Director has had the privilege of studying this record for more than eight years, and the tape and stenographic recordings are read by a large number of the Associates. We are indebted to Assoc. John A. Morrill for the above information, who adds a remark with which we heartily concur:

"So at last, after five years or more of struggle against heavy odds, recognition is coming and a great future is in store for them and their work - and for the BSRA in spreading the teachings originating with the M.P. Controls."

DR. GILBERT N. HOLLOWAY (D.D., Ph.D.), long-time friend and Associate of the BSR, continues his admirable series of articles in Psychic Observer. The issue of June 25 carries a lengthy discussion of "Breathing Exercises and Meditation", packed full of information and helpful suggestions. Dr. Holloway will be lecturing in Portland on and after June 6. The Hdqrs of the School of Philosophy which he heads can be reached at Box 27866, Los Angeles 27, Calif.

PROJECT HERMES again: Assoc. A.H.B., well-known in psychic research circles, sends us a note from the Birson Laboratory, London, to the effect that they have constructed the receiver, and that a friend who was testing it "heard a distorted voice, apparently that of a female. "I have reason to believe that I know who it was" he writes. "When I tried the receiver myself I felt what might be described as a tight band across the forehead when the switch was turned on." Lack of time and facilites prevented BSR Associates here, from going on with Project Hermes, but we will give the name and address of Assoc. A.H.B. on request, (to research workers only).

THE BLEWETT CLOUD: This is "a heretofore unidentified gaseous brown cloud of great size lying above the California coast... of unknown origin, never less than 1000 square miles in extent, riding atop clouds and weather inversions... descends as low sometimes as 500 to 5000 feet, and may reach into the stratosphere 5 to 10 miles. . ." Source: weather expert Stephen E. Blewett and consulting chemist F.E. Stewart, at a Statler Hotel press conference. "This cloud may be pollutant from somewhere else but we don't actually know" adds expert S.E.B. (Cr. Assoc, Gilbert Ryan).

NOTE OF INCREASED PRICES: The Cellular Cosmogony of Koreshan is $2.08. Guiding Star Pub. House, Estero, Fla. The Methods of the Magi, by E.McE.B., from Golden Dawn Press, 1044 So. Olive St., Los Angeles 15, is now 24¢ per copy - formerly 10¢. Five copies for $1.00. Info. from Mrs. T.U.Moore, BSRA.

"The balloonatics are on the loose again" writes Assoc. E.S.S., a propos of the "saucer" article in current Colliers. Our Associates should recognize that all this repetitious twaddle is to now be read as part of a national, probably a world-wide cover-up. Assoc. E.S.S. also encloses a clip of a news dispatch from Rome, re a suicide supposedly brought about by the impending "end of the world". "What would a real saucer debacle be like?" he asks. "But remember too that false rumours and panic may be started deliberately by organizations which could profit thereby".

"CLIPS, QUOTES, and COMMENTS" (bi-weekly) is issued on the first and fifteenth of each month, by the Borderland Sciences Research Associates--
-- 3524 Adams Avenue, San Diego 16, California, U.S.A.
-- Twelve issues (6 months) for $5.00; six issues, (3 mos.) for $2.50; two issues for $1.00. Contains only short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.

-N. Meade Layne, National Director.

CAVEAT EMPTOR - LET THE BUYER BEWARE:

For BUYER substitute BELIEVER, FOLLOWER, DISCIPLE, ACCEPTOR - of teachings and Teachers, of self-styled Masters, of purveyors of revelations, of any and all who profess to hold the "final truth" - to be the ultimate authority on any subject whatsoever: Then the old Latin maxim still holds good - let the "Buyer" indeed beware---

A sleepy bromide, you say - if ever there was one! YES - but also a warning to be shouted from housetops - a cry of FIRE in the night, or of floods descending, Noachian disaster. Of equal urgency with these is this CAVEAT.

We cannot, or rather will not 'name the names' - but already the crop of the pseudo-Messiahs flourishes, as from the sowing of dragon's teeth. As certain global and cosmic facts become realized by the swarming hives of humanity, this Chant of the Revelators will be dinned crescendo into every shadowfull corner.

Is there any refuge, for you and me, against this psychic infection, born of pseudo-knowledge, honest ignorance, mistaken service - and also of egoism, greed, and windy arrogance? "A man may protect himself against tigers" - goes an old saying - "and against thunder and lightning there is a refuge; but against his fellowman there is no refuge."

Is this really true? It is in my mind that the greatest enemy of man is the Sheep-Within, the follow-the-leader instinct, the undying stile-jumper close behind his woolly guides. DeQuincy had a word for it - sequaciousness (applied to style) - but it applies to nine-tenths of our alleged thinking also.

Is it possible, useful, desirable, even to make recommendation against this wooli-ness - that is, against non-critical acceptances of this book and that, of this marvellous tale and that, of smug-easy explanations, generalizations, fine pseudo - philosophical abstractions, "authentic" (i.e., imaginary) visits to other planets and systems, ouija-board revelations, astral projections, gibberish and fakery of low astral entities, welsh-rarebit visions ad nauseam - especially w hen all these have scattered through them certain grains of supramundane facts and truth (a word which has no definition). Shall I pick over all this garbage for fear of missing these grains? Or shall I reject everything and return to my cabbage rows? And how shall I identify the grains, if and when.....?

"Critical receptivity"! There's a fine phrase, if you please. It's supposed to be the guiding star of psychical research - and ortho-science also. Its content, of course, is fluent as quicksilver - but for lack of better we must hold fast to it.

There's a Spanish proverb: "If your number is five, keep an eye on Four and Six". If you're an honest man (as of course!), you'll admit, "I'm an ignorant seeker." If really so, keep an eye on all would-be teachers, revelators, wiseacres. If you want food, don't bolt the first offering. "The sages have misled mankind", mourns Lao-Tsu. How shall we find those who do not mislead - if any? Neither you nor I really know anything - but we have our acceptances (willy-nilly). On them, as on a foundation of sand, we pitch at least a nomad tent - careful, tentative, half-indifferent, knowing at least this, that if we do not strike this fragile shelter for ourselves, the Wind Between the Worlds will do it for us - tomorrow or tomorrow

All our questions have prompt answers -in the market-place. Such smug assured confident answers! Of one thing we can feel quite sure-that ALL of them are partial and inadequate. And nine-tenths of them are basically wrong. In the very nature of the case they are wrong -apart from exploitation and deliberate misleading. Let us consult our deepest instincts and the Highest Self. Caveat Emptor.

- M.L.

THEY'RE ALL ILLUSIONS, OF COURSE - 700 A WEEK OF THEM!!!

On his regular broadcast of June 10, the commentator Frank Edwards made the following statements:

THERE HAS BEEN NO DECREASE IN THE NUMBER OF REPORTED SIGHTINGS OF AEROFORMS (DISCS, "SAUCERS", and related phenomena)

LOCAL PAPERS ARE PERMITTED TO CARRY SUCH REPORTS, BUT WIRE SERVICE DOES NOT CARRY THEM

BUT - THE AIR FORCE SAYS "THERE IS NO SECRECY" !!!

REPORTS OF SIGHTINGS NOW AVERAGE ABOUT 700 PER WEEK. (Whether this includes foreign countries is not stated. ml) **

THE ASTONISHING FIGURE GIVEN ABOVE (700 per week) WAS GIVEN TO MR. EDWARDS BY THE DEPUTY COMMANDER OF WRIGHT FIELD AIR BASE, OHIO.

Mr. Edwards also quoted some 10-12 recent reports as examples - and urged all of his hearers who wanted him to continue broadcasting this material, to send him at least a postal to that effect. Address him either: Care of Mutual Broadcasting System, Washington, D.C.,- or Hdqrs. American Federation of Labor, Washington,D.C.-

It should not be necessary to ask all BSR Associates to comply with this request at once. In this case (unless you prefer otherwise) please mention BSR, or put BSRA after your signature. We have repeatedly urged all our Associates to listen to this commentator and support him in the matter of the Aeroforms, as being the ONE AND ONLY publicist on the air who has continued for months past to give reports on Disc sightings. Only by heavy pressure of public interest or through some unusual combination of circumstances can the "no secrecy" boys be forced to reveal the facts. And it is only by a true and careful statement of facts, that alarming and distorted rumours can be dealt with.

The thesis that public welfare can be served only by secrecy has now worn very thin indeed.

The story about landed (not captive) Discs at a California Air Base is known throughout the U.S. - except to those who depend only on the News Syndicates. It is even being repeated in various forms in the European press. What is needed now is the truth about this, on official letterheads. What we have gotten has been the horse-laugh -- from the Pentagon, at any rate.

It is true that public welfare is the prime objective. The question is about the means to that end. There are times and circumstances which demand secrecy. When these change and pass, other conditions demand truthfulness. A full revelation is inevitable. Do the authorities think that the shock can be cushioned by secrecy and ignorance.

The statement made to Frank Edwards by the Deputy Commander is not, presumably, to be construed as an official statement, but rather as a purely personal utterance. Nevertheless it derives its importance from his position and rank, and is a long step in the right direction.

Note:** It is not plain how the enumeration is made - whether (say) five Discs in one formation are counted as five sightings or as one.

"ELECTRONIC BUG CHASER"

..... But perhaps we should revert, for those who are as yet unfamiliar with the device, to explain what it is and how the inventors claim it works, fictional though the story may sound. Homeotronics, they define as treatment by small applications of electronic waves. It has been demonstrated, they explain, that many living organisms or biological processes give off radiation. Their work, they say, has shown that each living plant organism gives off radiations of definite frequencies and that each individual has a specific frequency. In order to treat a given plant electronically, the key to its specific frequency is found and registered on a key plate. This plate is then attached to their device, the Ukacometer, which reproduces the frequency, amplifies it and carries it back to the plant by radio waves. If some other substance, an insecticide for example, is placed on top of the key plate, its specific frequency, they claim, is added to that of the plant, and a modulated wave can then be broadcast back to the plant, thus giving the plant this added frequency characteristic. Simple, if you understand it!

The key for an individual plant is obtained by placing one end of an ordinary lead pencil, sharpened on both ends, on the stem of the plant and an ordinary card is moved across the other point, imprinting a pattern of the radiation frequency on the card.

No other plant except the one related to the key, say the inventors, will receive the treatment, although when a second plant touches the first plant, the key for both plants will be obtained, and both will received the treatment. If a whole field is to be treated, an aerial photograph is taken on ordinary film, and the film serves as the key for the whole field. To provide the usual entomological check on the experiments, one corner of the negative can be clipped off. Thus, it is explained, the plants appearing in that corner of the field willreceive no treatment, and will provide a check plot. According to the inventors, distance is no particular bar to effective treatment, it being claimed that broadcasts of insecticidal treatments can be made to areas a hundred or more miles away.

The device is a small aluminum box, similar in appearance to some portable radios. Dimensions are approximately 12" x 4" x 8". The instrument has only four connections two of which carry wires to a copper plate on which the key plate referred to above is placed. The other two connections are presumably power leads from the power source. A radio antenna protruding from the top of the case completes the equipment.

Trained observers who have inspected the machine, or listened to the story of its supposed method of operation, have been highly sceptical, and have had no difficulty at all in spotting many inconsistencies. They point out that it is difficult to conceive how a radiation pattern could be transmitted to a card through a pencil, or how the thousands of indivual patterns from a field of corn, for example, could be recorded on a photographic plate. Nor can they see just how it would be possible for these individual patterns to be picked up from a card or a photographic negative merely by laying this negative on a copper plate. Just how placing a minute amount of an insecticide on top of the plate could result in modulating the plant frequency and killing the insects thereon, is another point that is difficult for the real experts in the pest control field to grasp. Yet it all seems very obvious and logical to the inventors.

--from "Electronic Bug Chaser" --(reprinted from "Agricultural Chemicals",Jan.,1952).)

THE STORY OF THE AEROFORMS

by

Karl Heinz Wichodil

Translated by Hermann H. Mitchell.

From the German periodical Frankfurter Illustrierte, issues of Nov.14 -& Nov. 21, 1953. Editor, Werner Jaspert, at Gutenbergstrasse 7, Frankfort on Main. In intellectual weight and range of information seems to me superior to anything so far appearing in American publications. Their principal interest lies in the newly revealed advances made by scien - tists of our own planet along lines closely analogous to the achieve - m e n ts of the Etherian masters of the aeroforms.

The current widespread report of the presence of landed (not captive) Discs or "saucers" at an Air Base in California, continues to receive confirmatory (though not conclusive) evidence. It is said that the Etherian operators of these craft have given our own technicians extensive instruction - which suggests that these constructions are not wholly beyond the range of our earthly understanding. A question of critical importance, is whether similar instruction is being given to all other govenrments as well.

It has long been contended by the BSR publications that the aeroforms are, for the most part, of etheric origin, and that in their multitude they are invisible and intangible. This is an obvious inference from the presence of innumerable mutants or indescripts, which change size, shape and colour before our eyes, or vanish instantly from a resting position, or become translucent or transparent. This etheric nature, however, does not prevent them from becoming tangible, dense and steel-hard mechanisms when "materialized" within the earth's magnetic field. It is said that the technicians at the Air Base referred to, have re - peatedly witnessed this mat-and-demat process, to their own vast bewil-derment.

The author of the German article here translated shows no sign of having heard of the "4-D" or etheric account at all, yet the data referred to by him show how close our own race has come to obtaining propulsion from the cosmic energy, within our planetary environs. These facts by no means negate the "4-D" concepts, but should raise our hopes for future achievements under Etherian tutelage - if it be granted to us. We are inevitably reminded of the Vimanas of the ancients, whose powers of flight as described by Desmond Leslie from ancient documents rivaled within certain bounds the incredible performances of the Discs or aeroforms now present in our own skies.

We omit from the translation an introductory paragraph headed: Imagination or Reality, which quotes Captain Mantell's last message: "I see the thing -- almost 70 yards across -- I'm very close to it". But "shortly after that, all became silent on the saucer front". After this Herr Wichodel reminds us of the Orson Welles broadcast which "frightened two million people in two minutes ... " But I leave the rest to him and to the translator, Assoc. Mitchell.

(ml)

STORY OF THE AEROFORMS, CON.

(The preceding page is an advance printing of the full text of the Frankfurter Illustrierte to appear in Round Robin X-2, July-Aug.,'54; the article is too long to permit its publication in Clips & Quotes. We have, however, run off a few complete advance copies as a separate brochure, and Associates who do not wish to wait for RR X-2 may obtain these copies for $1.00. With each we will include, if desired, the First and Second Letters of Gerald Light (same as the Etheric Notes of Gerald Light) also in mimeo brochure form, 14 pgs., including the cosmological chart of the Etheric Zones of Terra.

Associates who wish to obtain either or both of these, please designate as follows:

STORY OF THE AEROFORMS: ITEM "A" (This brings the full advance copy of article in next RR, as a separate brochure .

STORY OF THE AEROFORMS ITEM "A" and ITEM B. (This brings the full advance copy of article in next RR., and also the 1st & 2nd Letters of Gerald Light. These letters have been published in earlier RRs but are here available separately in brochure form).

ONE DOLLAR brings BOTH brochures, but only if both are requested; Or, One Dollar will bring either brochure, or both if requested.

We are anxious to have this material circulate, but cannot afford to waste it by sending to Associates who do not want it or may already have it.

To give a better idea of the content of the Frankfurter Illustrierte articles, I quote a few additional lines:

" SECRET FILE NO. 250/eE. In March 1944 the Chief of the CIA stamped in bright-red letters the words Top Secret on the grass-green cover of a filing folder and registered it as 250/eE. In it, over the next few years, was to be collected all that could be learned about "flying saucers". The first leaf reports of sending abroad 16 agents; thus the file starts with espionage . . . in 1946 this first page was revised by the checking off of 14 names; the fate of Agent 16 was not clear ... only Agent 15 returned at that time. But in August 1949 Agent 16 returned ... and the offices of the CIA looked like a disturbed hornets' nest. . .

(from pgs 1-5)

"(The Lewetzow theory) holds that space is filled with a still unknown type of ray, the waves or particles thereof, coming from all directions, create a condition of balance as they seek to neutralize each other (cp. Einstein's later formulation of this)... Each ray exerts a sort of pressure on every body in space. Since they come from all sides, every body in free space is practically weightless. This balance is disturbed as soon as two bodies oppose each other, for the rays that have penetrated a body are greatly weakened. . . If man could artificially weaken these rays he would have a tremendous and practically inexhaustible source of energy at his disposal . . . This was Lewetzow's idea, 50 years ago. Today, officially, nothing is known of these rays. Why, then, should they not be discovered suddenly? Why, finally, not be able to travel on them... "

(This is followed by paragraphs on Pinkell's Report of Sept. 1943, the initial work on the "space island" etc... "If Secret File 250/eE has told us the truth (tho incomplete) we should see tomorrow flying saucers above our heads... Perhaps we shall know soon ..."

(The following letter tells its own story - one more outrage on the part of the Food and Drug Administration in full alliance with the A.M.A. (public enemy No. 1). Similar tactics by the same gang are being employed against the Electronic Medical Foundation of San Francisco - probably the most enlightened organization of its kind in the U.S.)

"Orgone Legal Fund
P.O. Box 174-
Lakewood, N.J.

Dear Sir:

You are no doubt aware of the injunction (issued March 19th) enjoining The Wilhelm Reich Foundation from the distribution of orgone energy accumulators as well as all the literature concerning orgone energy; and containing other sweeping edicts based on the completely irresponsible opinion of the Food & Drug Administration that orgone energy is NON-EXISTENT!

We assume that you must be outraged at this monstrous expression of human perversity which seeks to blockade access to the understanding of the basic natural laws of life and to the tremendous source of health in that knowledge and in the disease-preventive and therapeutic use of the life energy.

We are writing you in connection with a therapists' legal fund to be used in contesting this unconstitutional injunction. A very large amount of money is needed - perhaps 100,000 dollars. We are asking you to contribute to this fund. This fight concerns not only the immediate well-being of many sick individuals, but the future well-being of people at large. It is up to us, if we care about the free development of orgonomic work, to help remove the obstacles that hamper it.

Checks should be made payable to the Orgone Legal Fund and mailed to William Steig, P.O. Box 174, Lakewood, New Jersey.

Sincerely yours,

(signed) William Steig."

Associate A.L.G., of Elkhart, Ind. writes us in substance as follows:

Since reading in the March-April issue of Round Robin (pg. 18) about Osiris the Wonder Grain, I have been wondering whether there might not be many readers who like myself are somewhat 'agriculture-minded', and who would like to obtain a few dozen grains of this product to see how it might respond in our climate. . . Perhaps you could make a contact with some Frenchman who would send in enough of this grain seed for a trial run . . ."

The note about the Osiris grain occurs on pg 235 of Radio-Perception, The Journal of the British Society of Dowsers, Vol. XI No. 82, Pub. quarterly by the Society at York House, Portugal St., W.C. 2, Lon., Eng. The article quoted by R-P magazine was written by Carlo Franchini in Rivista Italiana, in late summer or fall of 1953 - excerpt translated and quoted by R-P. Probably the best way to handle this would be to inquire of the Editor of R-P., Col. A.H.Bell, York House, as noted above. A request could be inserted in some Egnlish or Continental pub.

MISCELLANEA: "THE COMING OF THE GUARDIANS" - AN INTERPRETATION OF THE FLYING "SAUCERS" AS GIVEN FROM THE OTHER SIDE OF LIFE. This is a 60-page compilation of statements made by the Mark Probert Controls concerning the Aeroforms, from 1946 to the present. A discussion of the subject which is unlike anything offered elsewhere. Mimeo., neatly bound; compiled by the BSR Director. We have only 200 copies remaining. Price, $2.00.

PERSONAL BULLETINS - or "P.B.'s." -- About half of our BSR Associates have taken advantage of this idea and have sent in the 10 stamped and self-addressed envelopes. This is, of course, a precautionary measure only, against the possibility of the present censorship becoming official and rigid.

All Associates who send in the envelopes receive the same information; it is impossible to carry on personal correspondence except in very few instances. We try to deal with facts that seem important and authentic - but we have no "secret service" and usually cannot "prove" anything to anybody, in the strict sense of the word. Still, the "P.B.'s" are confidential, for Associates only. Please respect this proviso.

----- ----- -----

A report from Auckland, New Zealand, describes a flight of some ten or twelve UFO's over that city and the great sensation produced thereby -- all this some time within the past two weeks (ante June 10, '54). -- Info. from publisher F.E. Rogers, San Diego, Calif.

Editor Egerton Sykes, Markham House Press, Ltd., London, England, sends us a memo to the effect that copies of the new book by Harold T. Wilkins - "Flying Saucers On The Moon", can be obtained from them at $2.60. Payment can be made in any form except stamps, (bills, coins, checks, money order.) Editor Sykes adds that Markham House "can supply ANY books published in Britain or Western Europe, and that their Journals are obtainable either direct or through Bobbitt Agency (Nashville, Tennessee): "ATLANTIS"; "NEW FRONTIERS"; "PENDULUM"; "URANUS".

"Uranus" is a new "Saucer Journal", the first issue of which will appear at the end of July, with Mr. E. Biddle as Editor. -- Subscriptions "$1.50 per annum -six issues. - Single, .25.

We have often referred to "PENDULUM" and recommend it highly in its field. -- Markham House Press, Ltd., 31 King's Road, London, S.W. 3, England.

(NOTE: Please do NOT order these publications from B.S.R.A. --)

RE: The 700 Sightings: We hope that this figure of 100 'sightings' per day, ex faucibus equi, will at least relieve the tensions of highly-esteemed Associates who have been sitting on the edges of their chairs for months, waiting for something to happen and somewhat annoyed with the BSR publications because of the delay. We have never tried to guarantee time and place and exact nature of coming events, and even now only point out that a huge concourse of visitors usually means something is happening or on its implacable way to happen. (Mother Earth is a gold-fish bowl, so far as privacy is concerned).
